Job Role: Front End React Developer (mid - senior)
Location: Remote with the opportunity to work from one of our offices: Preston, Liverpool, Manchester or London
Hours: 37.5 Hours per week (Monday to Friday)
Salary: Dependant on experience
Holidays: 33 days inclusive of bank holidays
Reporting To: Head of Development

*Do you love music and events? If so, we could be looking for you, a **Talented React Developer** to be a part of our expanding front-end team at one of the UK's biggest ticketing agencies, **Skiddle***

This is a tremendous opportunity for a professional to work in one of the most exciting industries in the modern job climate.

Company Background:
Skiddle was born in 2001 as a what's on guide and began selling tickets in 2006 and is now one of the UK's most loved ticketing services selling tickets for tens of thousands of events throughout the UK, from independent club nights through to 60,000 capacity festivals. Skiddle currently sells tickets for the likes of **The Warehouse Project, Creamfields, Digbeth Dining Club and Live Nation**, plus hundreds of independent venues and promoters across the country. Likewise, we host the largest festival guide in Europe.

Role Summary:
With over 10 million page impressions per month and sizable year on year growth, you will be working on the busiest event ticketing website in the UK. As an integral member of the team, you will need the technical background and expertise to suggest approaches to designing, developing and maintaining the front end of our applications. You will be contributing at the forefront of our applications that serve our customers and make a real impact on the events industry.

There will be the opportunity to work on a variety of projects where we provide an environment to learn new skills and develop on a personal and professional level. As the team has grown so has our commitment towards providing the necessary support and training to equip our developers with the resources and tools to deliver their best work. We work with our team to develop personal career plans not just in their areas of expertise but also provide the opportunity to explore other areas of interest that can grow their skills and shape their career pathway with Skiddle.

As a forward-thinking, agile company we're consistently adopting strategies that keep us ahead of our competitors and provide a real impactful experience for our customers, with technology being at the centre. This role provides an opportunity for individuals to actively contribute and share their ideas within a collaborative team environment. They will be encouraged to bring their unique perspectives to the table and have a meaningful voice in discussions.

Person Specification:
As a React Developer the individual will play a pivotal role in our development team and thrive in a dynamic and fast-paced environment upholding industry best standards to help build stable solutions. You will be a self-driven individual who is organised and possesses a high level of communication and the ability to collaborate effectively with cross-functional teams. The individual will have proven experience designing and developing production front-end applications within a team, including complex customer journeys such as checkout, with familiarity working closely with backend developers, QA and other stakeholders to receive feedback.

As a React developer, you will be capable of suggesting the best approach to finding solutions and can contribute to a project from concept to completion including how it is built, tested, secured and released. Our development teams move quickly, so an understanding of agile workflows and developing in an iterative process is desirable.

Essential Requirements:

- Minimum 2 years Commercial experience with React JS Framework.
- Familiar with modern JavaScript syntax and patterns
- Experience developing within the JavaScript eco-system using tools such as NPM.
- Demonstrable understanding of user experience (UX) & best practice
- Experience with GIT version control and GitHub
- Consuming APIs and integrating with third party software
- Testing, for example Vitest, Jest and Playwright
- TypeScript experience
- Experience managing asynchronous state in React
- Demonstrate knowledge of security best practices
- Ability to discuss technical solutions with team members and other stakeholders and provide innovative new ideas for solutions
- Experience with Agile process

Desirable skills and knowledge:

- Experience with Next.js for server-rendered, customer facing sites
- Familiarity with Copilot, Cursor or other AI tools to increase efficiency
- SEO for content-led pages, including metadata and indexable content
- Maintain a high awareness of industry issues and trends, particularly in regard to accessibility, usability, and emerging technologies, and keep team members informed as appropriate
- Integration of AI into a customer facing product

Nice to have:

- Amazon Web Services
- Docker and containerised front end builds
- Error monitoring such as Sentry
- Building or maintaining a shared UI component library
- Experience with ElasticSearch
- PHP / Mysql
- Shared packages in a monorepo

What can Skiddle offer:

- Friendly working environment
- Full Training
- Cycle to work scheme / Tech scheme
- Company pension
- Health insurance provided by Vitality after 1 year service
- Future career progression
- Increased Holiday entitlement after 1 year service
- New Company MacBook Pro
- Flexible working hours
- Free parking (if working from our Preston office)
- Opportunity to attend tech conferences (Web summit, PHP UK and more)
- Time given to progress skills, research and keep up-to-date with latest tech
- All expenses paid Christmas trip, including accommodation, travel and meals

On your side since 2001, because we believe true fans deserve a fairer and smarter way to discover events they love'.
